

# Polygonum perfoliatum

Invasive to Maine

Mile-a-Minute Weed,  
Devil's Tail, Tearthumb

Upland  
Forests, Fields, Wetlands, and Developed Areas

## Leaves

Leslie J. Mehrhoff

Look for triangular leaves that alternate and are 2 to 8 cm wide. The color of Mile-a-Minute Weed leaves are bluish to light green and have barbs on the underside.

LEAF ARRANGEMENT	LEAF TYPE	LEAF/LEAFLET SHAPE	LEAF/LEAFLET EDGE
 ALTERNATE	 SIMPLE	 PALMATE	 SMOOTH
 OPPOSITE	 COMPOUND-PALMATE	 DELTOID	 TOOTHED
 WHORLED	 COMPOUND-PINNATE	 ROUND	 WAVY

## Plant

Leslie J. Mehrhoff

Look for an annual trailing vine reaching up to 7 m, growing over other vegetation.

## Stem

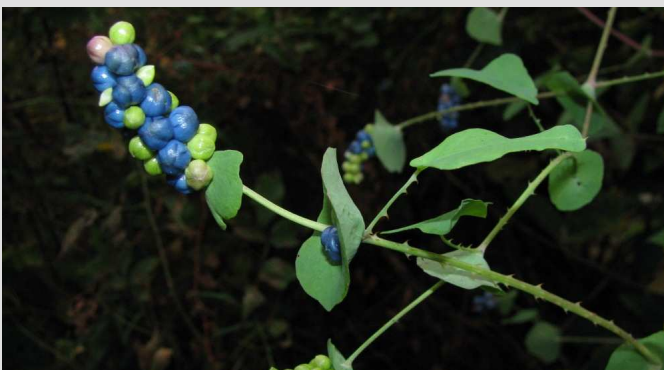

Leslie J. Mehrhoff

Look for stems that are 4-sided and have rows of small rigid barbs.

## Seasonal Change

Leslie J. Mehrhoff

In the late summer look for clusters of berries that are bright blue and pea-sized.

## Similar Species

While there are other Polygonum species, the triangular leaf of the Mile-a-Minute weed is unique and unlike any of the other related species. Other Polygonum species have arrow-shaped leaves.

## Fun Fact

The berries float which aids in its dispersal. Mile-a-Minute weed reportedly grows up to 15 cm per day!
